

Hunger Station - Programming - October - 2014

Coding Questions

1. Write a function to find duplicate characters in a string and also tell the count.

System Design

2. Design a scalable solution for a list of offers displayed on a certain screen:

- Fetched from backend
- Has pagination
- Scalable solution
- Frontend considerations

3. Suppose you have a list, and you are showing some type. Another team wants to show a different view in the same list.

- What conditions should be in place to support this?
